A Rarity in Nature.

IN *Bell-Savage-Yard* on *Ludgate-Hill*, at any hour of the day, is to be ſeen, A living Maid, from the Waſt upwards of a party Colour, like the Picture of a Mairmaid, from thence downwards is very ſtrange and wonderful, She hath been ſeen in *White-Hall*, and in both the Univerſities much admired by the learned, as in the following Verſes is expreſt.

What e're it means, what e're they ſignifie,
Behold in Microcoſme a Prodegy.
Nature Eclips'd: ſtrange Comets they appear,
Hairy almoſt all o're the Hemiſphære!
Only two Orient Stars above diſpence
Their benign Aſpects counter-Influence,
Or elſe 'tis what each Mothers Son might fear,
'Tis well ſuch great Eclipſes are ſo rare.
Strange ſight! how many Moles, & yet no Mole,
Here's no defect, but Parts more then the whole.

Sic

———————*mulier formoſa ſuperne*
Deſinit in Piſcem———————

Dans la place predit, l'on peut voir a toute heures du jour, une fille tres admirable, ſon Corps eſt de divers couleurs; avec beaucoup d'autres curioſities qu'on ne peut exprimer.

God ſave the King.
